

MOHAMED JAWADI

IT FREELANCER

ABOUT ME

I am a new embedded systems and mobiles graduated student. During my studies, I've worked on various freelance projects in many different IT domains such as Web development, mobile development, IT support, sysadmin... with 5 star reviews.

I am a hard worker with strong problem-solving skills, and the ability to quickly learn any programming, scripting language or framework that may be required.

I would be an excellent addition to any team and would love to aid in creating the best inventions out there.
